

The Titanium 125 and 165 Rinse Gum Units are designed to complement the Heights range of plate line equipment including the Titanium Processors, Post Bake Ovens and Conveyors.

After plates have been baked the Rinse Gum Unit is used to rinse and clean any residue post bake solution from the plate then apply a finisher/gum before drying.

Features include:

- PLC control system and full colour LCD touch screen display
- Small compact footprint
- High efficiency drying system
- Large bore/high flow waste drainage system

All major components used in the Titanium Rinse Gum Units are common with the Titanium Processors minimising spare parts stocking.

The Rinse Gum Units can be used as part of a new or existing plate line or off-line using the optional infeed and exit tables.

Other options include water recirculation, gum flush, drip tray and wash down hose.
